

Course Syllabus

ED780 Creativity, Innovation, and Intrapreneurship in Education

COURSE INFORMATION

Course Title:	Creativity, Innovation, and Intrapreneurship in Education
Credit Hours:	5
Prerequisites:	ED730, ED740, ED750, and ED770

COURSE DESCRIPTION

This course explores how creativity, innovation, and intrapreneurship drive transformative change in educational systems. You will examine how educational leaders and intrapreneurs identify opportunities, overcome barriers, and support sustainable innovation within educational organizations. You will investigate scholarly and practitioner literature related to an innovation-focused problem of practice. You will also begin developing methodological awareness by examining qualitative and quantitative approaches used in existing studies. Emphasis is placed on synthesizing leadership strategies, system conditions, theoretical frameworks, research gaps, and evidence-based solutions that support future applied research development. This course will be graded pass/fail.

LEARNING OUTCOMES

By the end of this course, you should be able to:

- ED780-1:** Examine the characteristics of educational systems that promote an environment conducive to intrapreneurship and innovation.
- ED780-2:** Examine how intrapreneurs identify opportunities, overcome barriers, and implement sustainable innovations within educational systems and organizations.
- ED780-3:** Design evidence-based solutions to complex educational challenges.
- ED780-4:** Synthesize leadership strategies and conditions that foster innovation and creative problem-solving.
- ED780-5:** Apply appropriate APA formatting in scholarly writing.

SOFTWARE REQUIREMENTS

The following software requirements are required in this course beyond the ones listed in the catalog:

No additional technology requirements beyond those in the Purdue Global Catalog.

GRADING CRITERIA/COURSE EVALUATION

Gradebook	Unit 1	Unit 2	Unit 3	Unit 4	Unit 5	Unit 6	Unit 7	Unit 8	Unit 9	Unit 10	Total
Discussion	40		40	40	40	40		40		40	280
Assignments	5	65	40	100			100		200		510
Seminar	40				40			40			120
Journal	20	5				20	5	20		20	90
Total	105	70	80	140	80	60	105	100	200	60	1000

SPECIFIC PROGRAM/COURSE REQUIREMENTS

[Reading List](#)

PURDUE UNIVERSITY GLOBAL GRADING SCALE

Grade	Points	Percent	Grade Point
A	900 - 1000	90% - 100%	4.0
B	800 - 899	80% - 89.99%	3.0
F	0 - 799	Below 80 %	0.0

INSTRUCTOR'S GRADING CRITERIA/TIMETABLE

Grades for each unit will be posted by the Monday of the following unit. If that Monday is an observed holiday, grades will be posted by the first business day following the observed holiday. Late work will be graded within 6 days of the submission date unless that falls on an observed holiday, in which case late work will be graded by the first business day following the observed holiday.

Reviews of all submitted work does not begin until the unit has closed.

Grades for **applied research projects** will be posted 10-days after the due date. Late work will also be graded within 10 days of the submission date unless that falls on an observed holiday, in which case late work will be graded by the first business day following the observed holiday.

POLICIES

Students who wish to review current policies (academic appeals, attendance/tardiness, etc.) should refer to the [Policy Information](#) in the current Purdue University Global's Catalog.

Purdue University Global's Artificial Intelligence (AI) Policy and Resources can be found on the [PG Center for Teaching and Learning's website](#). Students are encouraged to review the posted policy and refer to course materials for detailed guidance on AI use within each individual course.

As a student, you work hard to earn your degree. Protect the integrity of your work. Do not share your assignments, papers, quizzes, tests, etc. with other students. Do not directly or indirectly share your work by posting it to a third party website. Do not make use of another student's work in any academic activity. Unless specifically instructed to work in groups, do not collaborate with your classmates on assignments or tests. These actions violate the Purdue University Global [Code of Student Conduct](#) policy and, as a result, carry consequences. In some cases, students who are found in violation of these policies are dismissed from the University. You can also review the Writing with Integrity document located in Academic Tools in your course.

If you have questions about these policies, please review these policies in the catalog and contact your instructor.

ACADEMIC ACCOMMODATIONS - If there are any academic accommodations you feel would be helpful to you in your classes, please do not hesitate to reach out to [Student Accessibility Services](#) (SAS) for assistance.

NOTE: The contact information below is to request academic accommodations only and should not be used to contact your instructor. You can contact your instructor through the Brightspace classroom.

Tel: 317-208-1686

Fax: 866-422-4773 (Toll Free)

TTY: TTY users may dial 711 from their TTY phone, at no charge, to be connected with a Telecommunications Relay Services (TRS) operator who will assist with the call.

Accommodations cannot be granted retroactively and you are required to submit supporting documentation needed to process the request.

COURSE SPECIFIC POLICIES

Not Applicable

LATE POLICY

You are expected to submit all assignments and projects by the end of the Unit.

Students may turn in late work up to 2 weeks after the due date. After that, a zero will be assigned for each assignment. Ten percent of the assignment value will be deducted after the assignment is graded for each week that an assignment is late. For example, if your assignment worth 100 points is due on Tuesday and you submit it on Wednesday, 10 points will be deducted after it is graded. If you submit it 2 weeks late, there will be a reduction of 20% of the original assignment value after the assignment is graded.

All late work must be submitted by Sunday of the last unit. No late work will be accepted after this without an [Incomplete Grade](#) approval.

Certain course activities may not be eligible for late submission. These include, but are not limited to discussions, seminars, quizzes, labs, exams, and clinical activities.

We know that extenuating circumstances can interfere with timely submission of your work. Be sure to tell your professor and your Student Advisor right away if you are going to be late with a submission.

Your professor will determine whether an exception to the Purdue Global Late Policy is appropriate. They may also require you to provide documentation of the reason. If your professor determines that an extension is warranted, they will provide you with the expectations for your submission or assignment in writing.

Extenuating circumstances include, but are not limited to, personal/family member hospitalization, family member death, a severe weather event, a natural disaster, and an active military assignment that prevents internet connectivity. Computer-related issues, Internet connectivity, and account blocks are generally not considered extenuating circumstances.

TUTORING

Tutoring and many other resources are available in the Academic Success Center section of the Resources tab on the Purdue Global Campus home page. You can also find a link in the Academic Tools within your course.

The Academic Success Center offers:

- Writing help and APA resources
- Math help and resources
- Business help and resources
- Science help and resources
- Information technology help, webinars, and resources

ASSIGNMENTS

The course content is outlined within each unit and a calendar is accessible in each course.

A description of all major projects to be completed can be found under each of the units in the course.

Units end at 11:59 p.m. ET.

SEMINARS

Seminars (synchronous discussions) are included in this course to explore and apply the concepts presented here, to clarify key points and assignments, and to encourage interaction among you, your fellow students, and your instructor. Seminars are important to your growth and progress in the doctoral program. They are a crucial component of becoming part of your learning community.

Throughout your program, you will be asked to attend various Seminars. Your instructor will give details about the Seminar during the first week of the course.

DISCUSSION BOARDS

A description of discussion topics can be found under each applicable unit in the course.

Discussion Participation: Discussion topics are a key component of this course. They are an opportunity for students to apply and extend the concepts included in the course to real-world problems, scenarios, and case studies. They are an integral part of the interaction between students, instructor, and course content. Your classmates bring diverse perspectives and experiences to discussion topics—another valuable learning source. The instructor will interact with students within the Discussion Board each week. A discussion grade will be posted for each unit as indicated in the Gradebook section of the course.

Rubrics for all discussions are posted in your course.

RUBRICS

The rubrics that will be used to grade each assignment are available in Course Resources or the Assignments tab at the top of the Brightspace course. The rubric that will be used to grade the discussion is available at the bottom of each discussion.

NETIQUETTE

Interactions in an online classroom can be in written form as well as in audio or video. Your comfort level with expressing ideas and feelings in writing will add to your success in an online course. The ability to write is necessary, but you also need to understand what is considered appropriate when communicating online.

The word "netiquette" is short for "Internet etiquette." Rules of netiquette have grown organically with the growth of the Internet to help users act responsibly when they access or transmit information online. As a student, you should be aware of the common rules of netiquette for the web and employ a communication style that follows these guidelines.

- Wait to respond to a message that upsets you and be careful of what you say and how you say it.
- Be considerate. Rude or threatening language, inflammatory assertions (often referred to as "flaming"), personal attacks, and other inappropriate communication will not be tolerated.
- Never post a message that is in all capital letters — it comes across to the reader as SHOUTING! Use boldface and italics sparingly, as they can denote sarcasm.
- Keep messages short and to the point.
- Always practice good grammar, punctuation, and composition. This shows that you have taken the time to craft your response and that you respect your classmates' work.
- Keep in mind that Discussion Boards are meant to be constructive exchanges, and it is important to respect those views that are different from yours.
- Be respectful and treat everyone as you would want to be treated yourself.
- Use spell check before sending a written message

Using a webcam in an online meeting room requires thought and consideration for the netiquette environment. Keep your surroundings free of clutter and distraction. Do not allow others in your setting to enter the webcam view. Be sure your attire and background are appropriate for a classroom setting. If in doubt, turn off your camera. When using a microphone be mindful of your mute button - stay on mute until it is an appropriate time to speak - then enable your mute button again when you have finished sharing. Also, be mindful of how you reply to differing opinions or course content that you may not agree with. Feel free to express your views and ask questions in a calm and respectful way.

You should also review and refer to the section on [Responsible Use of University Technology](#) contained in the most recent Purdue Global Catalog.

OTHER POLICIES

To avoid plagiarism issues, citing research in American Psychological Association (APA) style is **required** in all School of Education courses. To ensure you accurately cite in APA style, you have two options:

1. Register for Account Access to APA Central at <http://apastylecentral.apa.org>, OR Purchase the APA Manual.

EdD Student Handbook: The EdD Student Handbook contains all the important information related to the doctoral program and policies. You must carefully review the handbook, as it contains most answers to questions regarding the program. As a doctoral candidate, we are assuming you have the necessary initiative to search out answers to questions on your own, and your first stop should always be the handbook. Your second stop can be the [Graduate Resource Center](#) and [EdD FAQs](#). If you have a question that those FAQs do not address, you can submit it to the EdD program email: edd@purdueglobal.edu.

Important:

You must be logged in to your Student PG Email Account to access the EdD Student Handbook.

The handbook is a living document that is updated regularly. Save the link and access it online to ensure you view the most current version.

Who Should I Contact?

Course Instructor: Any questions related to the course material, procedures, or policies should be directed to your assigned course instructor. Additionally, you should contact your instructor for the following:

- questions on grading
- questions on feedback and/or chapter content
- questions on course deadlines

Research Project Coordinator (RPC): You will work with your RPC during the development of your applied research project and paper:

You will connect with your assigned RPC in ED780 and consult on your topic selection and draft research questions.

During CM801: Doctoral Writing and Research, you will continue to consult with your RPC on topic and research questions.

From ED810 through ED840, including any extension courses, the RPC will:

Support you in obtaining site permission for your research, and

Review each stage of your applied research project as part of your doctoral committee.

Advisor: Your advisor can assist with questions related to university policies or your degree plan (including registration and course scheduling) and help resolve any outstanding issues by directing you to the appropriate person for assistance. To contact your advisor, visit Contact Us on PG Campus to find your Advisor's name and email.

Note: This syllabus is subject to change during this term/session or in future terms/sessions. This syllabus was published for course content as of 2604C.
